

# MEDIPO – ZT s.r.o.

The company MEDIPO-ZT, s.r.o. (Ltd.) was founded in 1996. It continued the activity of the company MEDIPO EM spol.s r.o., arisen through privatization of the Research Institute of Medical Technology under the concern CHIRANA.

In the field of medical technology, which is the priority, the company provides for the development, production, and service of its own products.

Equipment for non-invasive lithotripsy MEDILIT is an efficient instrument designed for non-invasive disposal of concrements in kidneys, urine and bile ducts, and for small orthopedic affections through a focused surge wave.

Paediatric vaginoscope MT 1000 with cold light source MT 2002 is designed for easy gynecological examination of children and adults. With the vaginoscope it is possible to see the changes on the vaginal mucous membrane and on the cervix, or an alien body and its positioning can be seen.

Infusion pumps IT 1012 and IT 1013 are designed for intravenous and intraarterial drug infusions, parenteral or enteral nutrition, or for blood transfusion. It is possible to operate them on a table, movable stand or in a vehicle. They are supplied by mains voltage or from internal accumulators, or from the vehicle electrical system.

The company MEDIPO-ZT, s.r.o. has a documented, implemented and functional quality management system in compliance with the standard ČSN EN ISO 9001:1995. This quality management system is applied to all activities, starting from the design, development, production, and services related to the supplies and service. For the specific part of its activities, which are the products determined by law, the system has been assessed, in accordance with the Government Order, by the Engineering Testing Institute s. p. in Brno, authorized person AO 202. The Engineering Testing Institute has issued the Certificate, Resolution No. B-30-01334/01. The quality management system thus implemented is being transformed recently into the documented form according to the standards ČSN EN ISO 9001:2001 and ČSN EN ISO 13485.
